I consider this to be one of the best books for beginners. Lots of "how to's", lots of illustrations and wonderful calligraphic styles to learn. I especially appreciate spiral bound books. A must have book for any beginning calligraphy student!

This book is, by far, the best book termed for beginners. Written by two outstanding artists in the calligraphy world, it gives outstanding instruction and examples. The reason I purchased this book, after getting it from the library, was because it has so much information packed in a small book and

most significantly all the specific tips and interline spacing suggestions. I like that it's spiral bound and can stay open on my slanted table.

I absolutely love this book! I am a beginner with Calligraphy and having so many alphabets available with the strokes for creating them is a real boon. I think having all the alphabets in one place will help me to create my very own "style".

For the past forty-five years I've done calligraphy. My grandfather had a SpeedBall Calligraphy Alphabet book. That, combined with an old pen and nib set got me started. While I don't practice it frequently enough to consider myself anything other than an amateur, I don't consider myself to be a beginner. Yet, this book is chock full of ideas, tips and approaches that I find very useful. If you don't buy any other Calligraphy book, spend your money on this reasonably priced gem!! I highly recommend this one.

What I like:* This book has MANY different alphabet "fonts" to choose from.* It's spiral bound and opens all the way, like a cookbook. So it works great for keeping the pages open while you practice. What I don't like:* The book is a little confusing b/c it is not arranged alphabetically, it's arranged by letter shape. So if you're learning how to create a "C," you'll find instructions for a "G" and a "Q" in the same section.

This is pretty good. It tells you how to hold the pen and get used to it, it has several different font types. It does say that you have to have this and this special thing, like professional ink, which isn't really necessary for a beginner.

I teach calligraphy and this book is one of my students' favorite reference book. It illustrates how to form the letters very clearly and is an excellent book to have if you want to write calligraphy.

Really like this book. It does not have dozens of alphabets but what it does have is several commonly used scripts. In the introduction is great information about pens, paper, angle, nib widths etc. I took a calligraphy course years ago but did not practice. This intro really jumped started my work again as it acted like a refresher course. I believe a beginner could use this book. The best part of this book is it shows angle of pen and direction of each pen stroke to create the letter. Notes and tips on creating letters are there also. I have a couple other little books with scripts but this one

is the best.
